Tools: Git, GitHub, Netlify, Vercel, surge, Dev-tools, VS-code, Prisma, Clerk

Hobbies: Football, Chess, Cricket, Badminton, Play Pc Games etc.

PROJECTS

Beyond The Stacks   Live-link↗   Github-Link↗

A Next.js project with Tailwind CSS for responsive UI. Includes configuration files for ESLint, Contentlayer, and Sitemap management. And a great object about this project is - it's a SEO optimized Blog website.

- Scalable Architecture: Designed for future growth and expansion.
- Modern UI/UX: Sleek and responsive design with Tailwind CSS.
- Monetization Features: Built-in functionality for selling AI prompts.
- Efficient Database Management: Prisma integration for streamlined data handling.
- TypeScript Support: Ensures robust, type-safe development.

Technologies: Next.JS, Typescript, MongoDB, Prisma, ContentLayer, PostmanApi, ShadcnUI, Framer Motion

PixelForge AI   Live-link↗   Github-Link↗

Pixel-Forge-AI is a complete AI Prompt Selling Marketplace, designed to help you launch your AI startup effortlessly. With a focus on ease of deployment and control, it's ideal for both newcomers and experienced developers. The project comes with a separate Admin Dashboard for seamless management.

- AI Prompt Marketplace: Pre-built with monetization features for easy setup.
- Admin Dashboard: Manage users, content, and marketplace operations effortlessly.
- Scalable Architecture: Designed to grow and adapt with future needs.
- Modern Design: Tailwind CSS ensures sleek, responsive UI/UX.
- Efficient Database: Prisma integration for smooth data management.

Technologies: Next.JS, Typescript, NextUI, TailwindCSS, ShadcnUI, Clerk, MongoDB, Prisma

Gaugeram Hessel   Live-link↗   Client-side↗   Server-side↗

Gaugearam-Hessel is a great project of a restaurant management system. Using React, Vite, Firebase, and Tailwind CSS, it offers a solid foundation for dynamic user experiences with clean, organized code. Ideal for both small projects and larger applications, it simplifies development and supports future growth.

- React + Vite template for fast performance and setup.
- Includes Firebase for hosting, database, and authentication.
- Tailwind CSS ensures responsive, customizable designs.
- Modular architecture supports scalability and future improvements.

Technologies: React.js, React Router, Node.js, Daisy UI, Firebase, JWT , Material-Tailwind, axios, Tanstack-Query.
